

## Monthly Progress Report May 2022

Measure	Description	May 2021	Nov 2021	Dec 2021	Jan 2021	Feb 2022	Mar 2022	Apr 2022	May 2022
Homes and businesses ready-to-connect	The number of homes and businesses that can order a plan via a phone and internet provider and connect to the <b>nbn</b> ® access network.	11,900,000##	12,000,000	12,100,000	12,100,000	12,100,000	12,100,000	12,100,000	12,100,000
Homes and businesses connected	The number of homes and businesses connected to a plan over the <b>nbn</b> access network through a phone and internet provider.	8,200,000	8,400,000	8,400,000	8,400,000	8,500,000	8,500,000	8,500,000	8,500,000
Right first-time installations	The percentage of homes and businesses that have their <b>nbn</b> equipment installed without additional work from <b>nbn</b> the first time the installation is attempted.	74%***	86%	87%	86%	86%	89%	88%	89%
Meeting agreed installation times	The percentage of premises that <b>nbn</b> connects to the <b>nbn</b> access network within target timeframes with phone and internet providers.	91%	97%	98%	97%	97%	97%	97%	98%
Average network bandwidth congestion	The average number of minutes of bandwidth congestion per week/ per service. This is calculated across all bandwidth purchased by all phone and internet providers across the entire network (CVC congestion). This excludes <b>nbn</b> Sky Muster™ satellite.	13 minutes	18 minutes	31 minutes	18 minutes	16 minutes	32 minutes	22 minutes	22 minutes
Fixed Line network congestion	The estimated monthly average percentage of homes and businesses who experience <b>nbn</b> access network congestion (as per <b>nbn</b> 's congestion measures for Fixed Line networks). This excludes <b>nbn</b> Fixed Wireless and <b>nbn</b> Sky Muster™ satellite.	0.000%	0.000%	0.000%	0.000%	0.000%	0.000%	0.000%	0.000%
Fixed Wireless busy hour cell performance	The percentage of cells with a monthly busy hour cell performance of 6 Mbps or more.	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Fixed Wireless busy hour backhaul performance	The percentage of cells on a backhaul link with a 28 day busy hour packet loss of less than 0.25%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
	The percentage of homes and businesses on a 50Mbps (download) wholesale speed plan or higher; and	73%	77%	76%	76%	76%	76%	76%	76%
Uptake to 50Mpbs or over - wholesale plans	25Mbps (download) wholesale speed plan or lower, purchased from a phone or internet provider.	27%	23%	24%	24%	24%	24%	24%	24%
Network availability	Percentage of time the <b>nbn</b> access network is available and operating. For this measure, the network is considered 'unavailable' during the time <b>nbn</b> is restoring services following the raising of a fault. It does not include periods where the network is unavailable due to operational outages for network upgrades and improvements or events beyond <b>nbn</b> 's control. This metric has been rounded to the nearest two decimal places.	99.96%	99.96%	99.96%	99.95%	99.93%	99.85%	99.96%	99.95%
Meeting agreed fault restoration times	The percentage of time <b>nbn</b> resolves accepted faults within <b>nbn</b> 's target timeframes with phone and internet providers.	70%***	90%	87%	88%	85%	81%	89%	91%
Faults after connection completed (per 100 connected homes and businesses)	The number of faults on the <b>nbn</b> access network per 100 premises per month (excluding faults within 10 business days of the connection).	0.6	0.9	1.0	0.9	1.0	1.2	0.8	0.8
Sky Muster™ Satellite Network Faults	This metric describes the total number of <b>nbn</b> satellite network faults that impacted end user <b>nbn</b> Sky Muster™ and <b>nbn</b> Sky Muster™ Plus services that first arose within the month.	8	22	18	14	20	24	18	10
Sky Muster™ Satellite Network Faults - Average Time to Restore	The Average Time to Restore measures the average time taken for <b>nbn</b> to resolve all <b>nbn</b> satellite network faults which affected the supply of <b>nbn</b> Sky Muster™ and <b>nbn</b> Sky Muster™ Plus services and first arose within the month.	144 minutes	42 minutes	60 minutes	36 hrs 54 mins++	67 minutes	89 minutes	31 minutes	19 minutes

It is important that this Progress Report is read in conjunction with the information on **nbn**'s website at <u>nbn.com.au/updates</u>

## Please note "Ready to Connect" included premises which were temporarily categorised as HFC supply constrained, where our work on the network was complete but for a short period, an order could be placed due to the global supply shortage impacting **nbn** HFC connections.

++The January 2022 data related to a temporary disruption to services on the **nbn** Sky Muster™ 1B satellite in December 2021. After an investigation involving **nbn**'s satellite monitoring partner, the disruption is believed to have been caused by a micrometeorite that impacted the satellite. Most **nbn** Sky Muster™ and **nbn** Sky Muster™ Plus satellite services were restored soon after the issue occurred, however, the disruption continued to affect approximately 0.5 per cent of customers connected to **nbn** Sky Muster satellite services although all services had been restored during January 2022.

\*\*\*\*This metric was impacted by some unexpected challenges following the implementation of a new appointment scheduling system.

## Fixed Wireless Busy Hour Cell Performance Categories

The percentage of cells performing within specified monthly busy hour cell performance categories between <3 Mbps and >=25 Mbps.

The percentage of cells in each category is calculated using the number of cells in the relevant category divided by the total number of active cells on the **nbn** Fixed Wireless network at the end of the relevant month.

Month	Monthly busy hour cell performance category	% of Fixed Wireless Cells in category		
	<3 Mbps	0.00%		
	3 to <6 Mbps	0.01%		
May 2022	6 to <12 Mbps	4.04%		
	12 to <25 Mbps	23.06%		
	>= 25 Mbps	72.90%		

It is important that this Progress Report is read in conjunction with the information on **nbn**'s website at <u>nbn.com.au/updates</u>

## Fixed Wireless Cell Performance by Hours Spent in Categories

A "specified cell" means those cells that have a monthly busy hour cell performance of either <3 Mbps, or 3 to <6 Mbps.

This table shows the average number of hours a day "specified cells" spent in each of the following performance categories (averaged over 30 days):

(1) <3 Mbps

(1) <3 Mbps (2) 3 to <6 Mbps

This is expressed as a percentage of all Fixed Wireless Cells, which is calculated by dividing the number of cells that fall into each hourly category by the total number of active cells on the **nbn** Fixed Wireless network at the end of the relevant month.

May 2022 performance category	Average number of hours per day spent in performance category*						
(cell hourly download)	0 to <1 hours	1 to <2 hours	2 to <3 hours	3 to <4 hours	>= 4 hours		
<3Mbps	0.00%	0.00%	0.00%	0.00%	0.00%		
3-<6Mbps	0.00%	0.00%	0.00%	0.00%	0.00%
