

Monthly Progress Report September 2021

Measure	Description	Sept 2020	Mar 2020	Apr 2021	May 2021	June 2021	July 2021	Aug 2021	Sept 2021
Homes and businesses ready-to-connect	The number of homes and businesses that can order a plan via a phone and internet provider and connect to the nbn [™] access network.	11,800,000	11,900,000##	11,900,000##	11,900,000##	12,000,000	12,000,000	12,000,000	12,000,000
Homes and businesses connected	The number of homes and businesses connected to a plan over the nbn [™] access network through a phone and internet provider.	7,700,000	8,100,000	8,100,000	8,200,000	8,200,000	8,200,000	8,300,000	8,300,000
Right first-time installations^^	The percentage of homes and businesses that have their nbn [™] equipment installed without additional work from NBN Co the first time the installation is attempted.	92%	87%	83%	74%****	78%****	82%****	87%	89%
Meeting agreed installation times	The percentage of premises that NBN Co connects to the nbn [™] access network within target timeframes with phone and internet providers.	96%	89%	92%	91%	93%	96%	97%	98%
Average network bandwidth congestion	The average number of minutes of bandwidth congestion per week/ per service. This is calculated across all bandwidth purchased by all phone and internet providers across the entire network (CVC congestion). This excludes Sky Muster [™] satellite.	17 minutes	32 minutes	19 minutes	13 minutes	19 minutes	27 minutes	16 minutes	16 minutes
Fixed Line network congestion^	The estimated monthly average percentage of homes and businesses who experience nbn [™] access network congestion (as per NBN Co's congestion measures for Fixed Line networks). This excludes nbn [™] Fixed Wireless and Sky Muster [™] satellite.	0.301%	0.014%	0.000%	0.000%	0.000####	0.000####	0.002%	0.065%
Fixed Wireless busy hour cell performance	The percentage of cells with a monthly busy hour cell performance of 6 Mbps or more.	99.9%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Fixed Wireless busy hour backhaul performance	The percentage of cells on a backhaul link with a 28 day busy hour packet loss of less than 0.25%	99.9%	100.0%	100.0%	100.0%	100.0%	100.0%	99.7%	100.0%
Uptake to 50Mbps or over - wholesale plans	The percentage of homes and businesses on a 50Mbps (download) wholesale speed plan or higher; and	70%	71%	71%	73%	75%	77%	77%	77%
	25Mbps (download) wholesale speed plan or lower, purchased from a phone or internet provider.	30%	29%	29%	27%	25%	23%	23%	23%
Network availability	Percentage of time the nbn [™] access network is available and operating. For this measure, the network is considered 'unavailable' during the time NBN Co is restoring services following the raising of a fault. It does not include periods where the network is unavailable due to operational outages for network upgrades and improvements or events beyond NBN Co's control. This metric has been rounded to the nearest two decimal places.	99.97%	99.95%	99.96%	99.96%	99.92%	99.95%	99.97%	99.96%
Meeting agreed fault restoration times	The percentage of time NBN Co resolves accepted faults within NBN Co's target timeframes with phone and internet providers.	93%	87%	87%	70%****	74%****	82%****	90%	93%
Faults after connection completed (per 100 connected homes and businesses)**	The number of faults on the nbn [™] access network per 100 premises per month (excluding faults within 10 business days of the connection).	0.6	1.0	0.7	0.6	0.7	0.8	0.8	0.7
Sky Muster [™] Satellite Network Faults	This metric describes the total number of nbn [™] satellite network faults that impacted end user Sky Muster [™] and Sky Muster [™] Plus services that first arose within the month.	10	16	6	8	14	11	8	11
Sky Muster [™] Satellite Network Faults - Average Time to Restore	The Average Time to Restore measures the average time taken for NBN Co to resolve all nbn [™] satellite network faults which affected the supply of nbn [™] Sky Muster [™] and Sky Muster [™] Plus services and first arose within the month.	40 minutes	19 minutes	227 minutes	144 minutes	147 minutes	61 minutes	45 minutes	42 minutes

It is important that this Progress Report is read in conjunction with the information on NBN Co's website at [nbn.com.au/updates](#)

Please note "Ready to Connect" includes premises which were temporarily categorised as HFC supply constrained, where our work on the network is complete but in the short term an order could not be placed due to the global supply shortage impacting **nbn**[™] HFC connections and some issues with our new workforce scheduling system. [See here for more information](#)

'Fixed Line Network Congestion' was incorrectly reported in June 2021 at 0.010% and in July 2021 at 0.011%, and were actually both 0.000%.

****This metric was impacted by some unexpected challenges following the recent implementation of a new appointment scheduling system.

Fixed Wireless Busy Hour Cell Performance Categories

The percentage of cells performing within specified monthly busy hour cell performance categories between <3 Mbps and >=25 Mbps.

The percentage of cells in each category is calculated using the number of cells in the relevant category divided by the total number of active cells on the **nbn**[™] Fixed Wireless network at the end of the relevant month.

Month	Monthly busy hour cell performance category	% of Fixed Wireless Cells in category
September 2021	<3 Mbps	0.00%
	3 to <6 Mbps	0.00%
	6 to <12 Mbps	3.36%
	12 to <25 Mbps	22.05%
	>= 25 Mbps	74.59%

It is important that this Progress Report is read in conjunction with the information on NBN Co's website at [nbn.com.au/updates](#)

Fixed Wireless Cell Performance by Hours Spent in Categories

A "specified cell" means those cells that have a monthly busy hour cell performance of either <3 Mbps, or 3 to <6 Mbps.

This table shows the average number of hours a day "specified cells" spent in each of the following performance categories (averaged over 30 days):

(1) <3 Mbps

(2) 3 to <6 Mbps

This is expressed as a percentage of all Fixed Wireless Cells, which is calculated by dividing the number of cells that fall into each hourly category by the total number of active cells on the **nbn**[™] Fixed Wireless network at the end of the relevant month.

September 2021 performance category (cell hourly download)	Average number of hours per day spent in performance category*				
	0 to <1 hours	1 to <2 hours	2 to <3 hours	3 to <4 hours	>= 4 hours
<3Mbps	0.00%	0.00%	0.00%	0.00%	0.00%
3-<6Mbps	0.00%	0.00%	0.00%	0.00%	0.00%

It is important that this Progress Report is read in conjunction with the information on NBN Co's website at [nbn.com.au/updates](#)

*Note a cell with a monthly busy hour cell performance of under 6Mbps may fall within both of these performance categories, and as such the rows may not add up to the proportion of cells with a monthly busy hour cell performance of under 6Mbps
